

“The straw that broke the camel’s back”

**“Idioms”
Credit from tales of
Arab**

Refers: To a **minor happening, circumstance**, etc. which, when added to a whole string of other **annoyances**, is **finally** too much to **bear**. When something is the last straw or the straw that broke the camel's back, a negative **consequence** is about to **occur**. This consequence could be a **disaster**, or **simply** a loss of control or **temper**.

This **idioms** last straw or final straw have the same meaning and can be used **interchangeably**. The straw that broke the camel's back in the **original proverbial** idiom and the source of all **three variations**. “The last straw” or “The final straw”

are both more commonly used than the full idiom '**straw that broke the camel's back**'.
